EMPLOYMENT HISTORY

German Steel Contracting LLC

HSE Officer

Sep 2025 - Present | Ajman, United Arab Emirates (UAE)

Direct health, safety, and Environmental (HSE) governance across 7 concurrent construction projects valued over AED 100 million involving high-rise structural steel, facade, and specialist construction works. Coordinate Permit-to-Work requirements, risk management initiatives, and stakeholder engagement activities across project teams exceeding 400 personnel and multiple subcontractors while supporting delivery of multimillion dollar projects.

Key Responsibilities & Achievements

- **HSE Compliance & Leadership:** Oversee day-to-day site safety operations, ensuring strict alignment with ISO 45001 standards, client HSE specifications, and UAE federal safety regulations.
- **Digital Safety Innovation:** Spearhead the integration of digital reporting tools, smart dashboards, and automated workflows to streamline risk assessments, reducing administrative paper lag and accelerating hazard closeout times.

Evan Lim Penta Construction LLC

Safety Officer

Apr 2022 - Sep 2025 | Dubai, United Arab Emirates (UAE)

Supported HSE operations for high-rise residential construction projects with workforces exceeding 400 personnel during peak construction phases. Worked closely with project management, consultants, and subcontractors to maintain regulatory compliance, manage high-risk activities, and support safe project delivery across multiple construction disciplines.

Key Responsibilities & Achievement

- **Main Contractor HSE Governance:** Enforced site wide HSE protocols across all construction phases (substructure to high-rise superstructures), ensuring strict compliance with Dubai Municipality (DM), Civil Defense, and client safety specifications.
- **High-Risk Activity Management:** Engineered high-risk RAMS and field inspections for deep excavations, tower crane lifts, formwork installation, post tensioning, and heavy concrete pours.
